

We are a dynamic, award winning lighting systems integration company working on a wide range of exciting lighting projects in the theme park, theatre, entertainment and architectural sectors throughout Asia. We are now looking to hire a **Systems Design Manager (1 year contract)**.

Responsibilities

- Report to Project Directors and Technical Managers;
- Co-ordination between Systems Designers and contractors to ensure that the contractor's understand the design intent are delivering the system in accordance with said intent.;
- Reporting back to the Systems Designers any concerns that they may have about on site works;
- Management, co-ordination and liaison of systems design at project site level;
- Frequent visits to client offices and site required;
- Work alongside office design team to understand the technical requirements for each project;
- Attending pre-site co-ordination and site progress meetings including preparation of meeting notes and updates to office design team;
- Acknowledge and handle queries from various project stakeholders;
- Assist to review submissions from SIC;
- Any other duties as assigned.

Requirements

- Holder of a Degree in a technical discipline;
- Minimum five years co-ordination experience in a construction / installation related environment;
- Fluency in spoken and written English and Chinese is a must;
- Ability to read technical drawings is required;
- AutoCAD skills an advantage;
- Familiar with the lighting and/ or audio visual industries and products an advantage;
- Ability to fulfil responsibilities independently, working within a teamwork environment;
- Excellent communication skills, self-motivated, calm and observant, attentive to details, flexible personality, well organised.

Note: This is a one-year fixed term project specific contract with possible renewal subject to the requirements of the project(s) and the company. This is not a systems design role, but rather a design management and co-ordination role. Once site works commence, the Systems Design Manager may be required to work 6 days a week, depending on project circumstances.
